

# About The Project

Opinions is a form builder app to conduct Surveys online and to view responses in mobile devices itself.

## Stakeholder Requirement

1. Create a Quiz App which would contain a Quiz Dashboard.
2. The App should contain all the Quizzes.
3. There should be two/three Screens in the App.
4. App Design should be using Figma.
5. User-centric approach to design and an understanding of how to apply ideas into design and development of the product experience.

## What I Did?

After Understanding the stakeholder requirements.I have opted to User-centric approach, so that i can create best experiences for the users.

## Empathy

### Says

I want to create a quiz for my students.  
I want the results to be displayed immediately.  
I want to add customisable questions

### Feel

Excitement  
Overwhelming  
Creative

### Do

Write down questions in paper  
Opens survey apps to share with students

## **Think**

What apps are available for quizzes?  
How can I view my quiz results?  
Is there an option to customize a quiz?

## **User Persona**

Name: John  
Age: 35  
Occupation: Teacher  
Family: Married  
Education: Post Graduate  
Hometown: Bangalore

## **Goals**

To create a quiz online and share with his students  
Get real time results  
Quiz personalization

## **Pain Points**

Spent a lot of time to find quiz apps  
Confused interfaces  
Limited Number of options

## **Brief**

John is an online Tutor representing a school whose students are attending online classes remotely. He wants to keep his students engaged by creating a quiz of what students understand about classes.

## **User Story**

As an online tutor, I want to create a quiz for my students because i want to get feedback on what students understand about the subject

How Might We?

How Might We Keep the Interface Simple ?

How Might We Create Customizable Quiz ?

How Might We Create a Quiz and share with students?

How Might We Get Real Time results?

Solutions

To let the quizzier customize quiz

Providing an option to share the quiz after created

Provide an option to keep track of the quiz
